

The local weather/traffic services that XM radio provides, add to public safety, pollution reduction, and happier commuters who can now avoid traffic jams, with USEFUL traffic information.

XM Radio has the right to broadcast whatever content they choose, especially to PAYING subscribers. It is purely unconstitutional to impose any limitation on XM Radio, and just like cable or satellite TV service, XM should be afforded the same basic rights.

Instead, use your resources to ensure the multitudes of jacka** air jockeys like Howard Stern are filtered from the "public airwaves", and placed on pay-for-service venues.

Do the right thing.
